PROJECT

E-commerce Website using Django

- Developed a fully functional e-commerce website using Django framework. Implemented features such as product listing, cart management, and secure checkout.

CRM Website using Django

- Created a CRM (Customer Relationship Management) system using Django, allowing efficient customer data management.

Built Django Authentication and Authorization System

- created a reliable Django user authentication and permission mechanism.

Weather App

- Developed a feature-rich Django-based weather forecasting application that provides users with a wide range of weather information, including the current weather conditions, the next 3 days' weather forecast, and a historical record of the past 3 days' weather. Utilized the WeatherAPI.com API to source real-time weather data.

SKILLS

HTML
